The catalytic lamp
with the Millefiori fragrances

A SCENTED HOME

Lampair helps create a pleasant-smelling space in any room. Thanks to Lampair's technology, a light amount of the chosen scent is steadily emitted in a very short lapse of time.

Among the many methods for cleaning the air, catalytic combustion is an excellent way to eliminate odours. The catalytic combustion of Lampair diffusers, unlike ordinary systems which just cover odours, makes it possible to burn particles of smoke or other substances with an unpleasant odour and simultaneously emit a nice scent in the room.
